Thanks in advance. Page 2 2 15 comments 5 Comments I've seen a lot of people wanting to watch this movie, found a link that does not work, but unfortunately it is treito playback so it is not the best quality, I personally would expect Blu Ray's release sometime next year, but if you have been waiting since July to jump on the movie for free, then I would look at it. Bluray is expected to come up with something January but if you have money id say just fly to Melbourne and check it on the subs there.
